What is a modifier? A modifier is a photographic tool that allows photographers to change the light in different ways.

When writing, think about the **highlight**, **core**, **shadow**, and **cast shadow**.

Modifier A:

Part 1 - Answer each question with at least one full sentence.

1. Describe the surface of the modifier:
2. How do you predict the modifier will effect the light?
3. How do you predict the modifier will effect the subject?

Part 2 - Answer each question with at least one full sentence.

4. How did the modifier actually effect the light?
5. How did the modifier actually effect the subject?
