*Leave a blank square for spaces between words!

Across
3. When parts of the photograph are on different planes that you can edit individually
4. The primary colors are red, green, and blue, unlike the art tool of a similar name
6. Too much has been done to the photo and it appears 'over the top'
7. any extension that starts with a period
8. This is important both digitally and in the darkroom. You need black, white, and a variety of tones to achieve this.
12. Altering the artwork of others to create something new and entirely your own
14. dpi and ppi are another way of saying this.
15. Taking other people's artwork and calling it your own
16. File format we often don't use, but it can save multiple layers
17. File format that saves only one layer and is slightly smaller

Down
1. These are across from one another on the color wheel
2. The steps for editing your digital image - also called a work flow
5. Magazines do this to make models look 'perfect'. Of course, perfect doesn't exist!
9. Changes made to an image that alter the original - the sky's the limit!
10. Minimal changes are made to an image to make it stand out a little more
11. Must be set to 300 in order to be a quality that is high enough to print
13. File format we use that saves multiple layers
